Ninth International Workshop on Variability Modelling of Software-intensive Systems

January 21-23, 2015

Hildesheim, Germany

www.vamos-workshop.net

Welcome

We welcome you to VaMoS 2015, the 9th International Workshop on Variability Modelling of Software-intensive Systems. VaMoS always aimed to be a place where the newest developments in the area of variability can be shared and discussed. We are happy to host this event in 2015 at the University of Hildesheim, Germany, and thus continue this highly successful series.

The program of VaMoS adheres to the well established and successful scheme: we will have two keynote speakers: one from industry (Stefan Kuntz) and one from research (Jean-Marc Jézéquel). The main part of the program consists of selected high-quality papers (acceptance rate 47%).

For each paper a discussant has been assigned, but of course we are counting on everyone to contribute to the discussion. We hope you will take home a lot of new insights and ideas.

Once you visit the town, you will see that Hildesheim is a charming city with many nice spots. It has two UNESCO world heritage sites as well as a nice downtown area. As part of the social events we will visit some nice places, but there is more to see.

We hope you will experience VaMoS as an insightful event, and you will always remember it as a nice experience both from a research perspective as well as from the personal side.
